github.com/Ishan-Tharusha

SUMMARY

Junior Full-Stack Developer with hands-on experience designing and building end-to-end web applications using ASP.NET Core, Node.js, React, and Angular. Skilled in architecting RESTful APIs, implementing secure authentication and validation layers, and managing both relational (MySQL) and NoSQL (MongoDB) databases. Adept at building responsive, user-friendly interfaces and seamlessly integrating frontend and backend systems. Experienced in AI-assisted and agentic development, using AI coding agents and LLM tools to accelerate delivery, debugging, and code quality with careful human review. Driven by a passion for clean, maintainable code and a continuous focus on improving application performance and scalability.

EXPERIENCE

Intern Software Engineer

Roodwave
09/2025 - 03/2026

- Contributed to the development of a cloud-based Enterprise Resource Planning (ERP) platform, working on Procurement, Sales, Inventory, Finance, and Customer Management modules
- Developed workflows, reports, dashboard widgets, and business validations
- Fixed bugs, optimized data loading, and improved user experience across multiple modules
- Gained practical experience with Vertical Slice Architecture, CQRS, Modular Monolith architecture, Microservices, Ocelot API Gateway, and Identity/Authentication
- Worked with Angular, TypeScript, C#, ASP.NET Core, Entity Framework Core, SQL Server, REST APIs, Git, and Azure DevOps
- Contributed to a MERN-based employee and project management application, implementing Projects Management features across the frontend and backend
- Developed REST APIs and implemented MongoDB CRUD operations for application data management
- Integrated frontend components with backend APIs and resolved integration and debugging issues
- Developed responsive web interfaces using React.js and Tailwind CSS based on provided UI designs
- Collaborated with frontend and backend teams to deliver enterprise software features
- Used Git/GitHub and Azure DevOps for source control, task management, bug tracking, and collaborative development
- Gained hands-on experience in Agile-style software development and improved practical skills in React.js, Node.js, Express.js, MongoDB, and Tailwind CSS

EDUCATION

B.Sc. (Hons) in Information Technology

Sri Lanka Institute of Information Technology
2022 - 2026

G.C.E. Advanced Level - Physical Science Stream

Dudley Senanayake Central College
2016 - 2018

STRENGTHS

Problem Solving & Debugging
Quickly traces and fixes integration and data-loading issues across frontend and backend.

Team Collaboration
Works smoothly with frontend and backend teams in Agile-style environments.

Quick Learner
Picked up enterprise patterns such as CQRS, microservices and API gateways during internship.

Clean, Maintainable Code
Focused on validation, clear routing and scalable project structure.

LANGUAGES

Sinhala

English

SKILLS

Languages
C#, JavaScript, TypeScript

Frontend
Angular, React, HTML, CSS, Tailwind CSS

Backend & APIs
ASP.NET Core, Node.js, Express.js, REST APIs

Data & ORM
SQL Server, MySQL, MongoDB, Entity Framework Core

Architecture & Tools
CQRS, Modular Monolith, Git, Azure DevOps

PERSONAL PROJECTS

Food Menu Web Application - ASP.NET Core

- Developed a backend food menu web application using ASP.NET Core
- Implemented RESTful APIs for CRUD operations on food items and categories
- Integrated Entity Framework Core for efficient data access and management
- Used AI-assisted development to scaffold endpoints, validation, and test cases, reviewing and refining all generated code

Online Text Editor - ASP.NET Core MVC

- Developed a web-based text editor application using ASP.NET Core MVC
- Implemented CRUD operations to create, edit, and save text documents online
- Used Entity Framework Core for database interaction and data persistence
- Applied AI coding assistants for debugging, refactoring, and UI improvements

Online Car Rental Service - MERN Stack

- Developed a car rental web application with admin and employee panels for managing bookings, users, and vehicle availability
- Built RESTful APIs using Node.js and Express.js with MongoDB for user and booking data
- Designed an interactive frontend using React with React Router
- Used agentic AI workflows to speed up component generation, feature development, and bug fixing
